## High System

I carrelli High System, grazie alle loro innovative caratteristiche tecniche ed all'estrema funzionalità, rappresentano una novità interessante in quanto concepiti nel rispetto dei principi di massima ergonomia per l'operatore che può contare in un attrezzo decisamente valido, competitivo e professionale.

Il punto di forza della nuova linea High System, oltre alla rapidità nell'assemblaggio, consiste nel fatto che assume diverse configurazioni in base al numero dei cassetti estraibili che possono essere dotati di coperchio e dell'apposita griglia per una uniforme impregnazione.

La praticità dei carrelli High System è anche garantita da una serie di accessori estremamente comodi come i secchielli per l'impregnazione di uso professionale e disponibili in 4 colori, il doppio porta sacco 2 x 70 lt. per una raccolta differenziata e tanti altri optional che ne completano la nuova linea.

I carrelli High System, facili da pulire, esclusivi ed unici nella loro struttura, sono il risultato di un continuo miglioramento degli standard qualitativi.

The High System trolleys, thanks to their innovative technical characteristics, and to the extreme functionality, represent an interesting novelty on the market as they have been conceived with respect to the principles of ergonomics.

The strongest values of the new High System line, very easy to assemble, are the multiple configurations, with the ability to customise the base, the number of pull out drawers and also the drawer covers.

A further demonstration of the application of ergonomic principles can be seen in the High System trolley line's series of extremely comfortable accessories such as the buckets, available in 4 colours, for the impregnation and the double bag support 2 x 70 lts which enables diversified garbage recovering, to name but two.

The High System trolley line is easy to clean, exclusive and unique in his structure, is the result of a continuous improvement of our qualitative standards.

# Antares

## Security

I carrelli Antares Security, proposti in diverse versioni personalizzabili in base alle esigenze del cliente, sono ideali per essere inseriti in ambienti di grande passaggio (ad esempio ospedali, scuole, asili nido, aeroporti, centri commerciali, ecc) in cui è indispensabile, per motivi di massima sicurezza, disporre tutta l'attrezzatura ed i prodotti chimici con ordine ed al riparo da possibili sottrazioni improprie.

Le porte centrali, posizionate in entrambi i lati del carrello, sono dotate di serratura con chiave: all'interno vengono inserite ampie vaschette portaoggetti adatte a contenere tutta l'attrezzatura da salvaguardare.

Il supporto sacco è protetto anch'esso da due porte ad angolo in ABS con cerniere apribili a scatto e con la possibilità di chiuderle con lucchetto. Queste porte, inoltre, possiedono una duplice utilità in quanto consentono sia di proteggere i rifiuti sia di sfilare con estrema facilità il sacco a fine lavoro.

L'intera linea è arricchita con accessori ed optional estremamente funzionali e pratici come lo scrittoio estraibile a scomparsa che all'occorrenza funge anche da comodo piano d'appoggio riuscendo a supportare diversi kg di peso.

The Antares Security trolleys, proposed in different "on client demand" versions, are ideal to be used in highly frequented areas (for example hospitals, schools, childcare facilities, airports, business centres, etc) where for safety reasons is essential to have all cleaning equipments and chemical products correctly and properly arranged and above all protected from possible improper and dangerous use.

Central doors, settled in both sides of the trolley, are equipped with key-lock.  
Inside the cabinet there are large trays ideal to contain all necessary equipment that has to be safe.

Bag support is protected from two doors in ABS as well, with pushing zippers opening system, lock in option.  
These doors not only protect the waste bag but allows easier bag removal too.

The whole line has been enriched with very functional and handy accessories as the pull-out writing desk that on need can be also used as a practical support tool with carrying capacity of many kg.

# Antares Security I

In alternativa può essere fornito  
senza contenitore salva sacco.  
*Alternative solution: can be  
delivered without bag cabinet door.*

# Antares

Stiamo ora per presentarvi un'altra famiglia della Linea Ecologica: i tradizionali Antares, la cui caratteristica predominante è la possibilità di poter montare su tutti i carrelli la nuova versione di ruote gommate Ø 150 mm. Dotate di cuscinetti a sfera con parafile e gommatura poliuretana soffice sono scorrevoli, silenziose ed ideali per l'utilizzo dello stesso anche in ambienti esterni.

I carrelli Antares sono curati in ogni minimo particolare: infatti, ogni punto di aggancio è protetto da mostrine che permettono di sottolineare il design.

Da non tralasciare un ulteriore elemento rilevante: il porta sacco dotato di maniglia ergonomica di serie con la possibilità di montare come optional il kit porta sacco security, munito di chiave senza avere la preoccupazione di subire sottrazioni di materiale personale o documentazione nel momento in cui l'operatore lascia il carrello incustodito.

We are now about to introduce you another family of the Ecological Line: the traditional Antares, whose new predominant characteristic is the possibility to put the special version of rubber wheels Ø 150 mm. These castors fitted with sphere pads and soft polyurethane gummi make the trolley softly and silently flowing. Thanks their high resistance use in external environments is as well proper and suggested.

Antares trolleys have been taken care in every least details: in fact, every point of hook-up is protected with dovetails able to underline trolley design much more.

Not to forget a further remarkable element: the bag support is equipped with ergonomic handle where the option "security kit" can be settled; provided with key you will not have the worry to suffer subtractions of personal material or documentation while unattended.

# Antares I

Kit porta sacco security munito di chiave e porta deodorante.  
*Bag support kit, equipped with key and deodorant holder.*

## Evolution

Da ultimo, ma non ultimo, IPC Euromop presenta la linea Antares Evolution che completa la linea Ecologica. Anche questa linea di carrelli è stata progettata e realizzata internamente all'azienda ed è frutto di una accurata analisi dei bisogni del cliente sia in termini di servizio, immagine e funzionalità di prodotto.

Grazie alla loro molteplicità di versioni ed accessori, i carrelli Antares Evolution, disponibili anch'essi con ruote in gomma Ø 150 mm, rispondono a 360° alle esigenze degli operatori in quanto realizzati con materiali leggeri e resistenti senza nessuna parte metallica.

Estremamente versatili e di ottima stabilità, i carrelli Antares Evolution hanno anche il vantaggio di essere compatti nelle dimensioni e pratici nell'uso.

Last but not least, IPC Euromop introduces the Antares Evolution family that completes the Ecological line. Of course this line has been projected and realized internally to our factory and is the deserved result of an accurate analysis about client needs in terms of service, image and functionality of product.

Thanks to the multi-tasks of versions and accessories, the Antares Evolution line, available also with rubber wheels Ø 150 mm, responds at 360° to the demands of the operators as it is realized with light and resistant material without any help of metallic parts.

Extremely versatile and of good stability, the Antares Evolution trolleys also has the advantage to be compact in the dimensions and practical in the use.
